Important Notices

- Please read all instructions and warnings carefully before using this product.
- For your safety and that of others, do not watch videos while driving. Always follow local traffic regulations.
- Do not use or store this product in environments with high temperatures, direct sunlight, strong magnetic fields, or other extreme conditions.
- Avoid exposing the device to strong physical impacts, such as dropping, crushing, or stepping on it.
- Use only power supplies that match the product's rated voltage. Using an incorrect power source may result in malfunction or damage.
- Disassembly of the product is strictly prohibited. Any attempt to do so will void the warranty.
- Always operate the device in accordance with the instructions provided. The user assumes full responsibility for any damage or risk caused by improper use.

The information contained in this manual is subject to change without prior notice.

Is this product compatible with my car?

This product is only compatible with vehicles that originally support wired CarPlay or wired Android Auto.

■ How to check if your car has wired CarPlay?

Connect your iPhone to the car's USB port using the original data cable. If the CarPlay icon or a related prompt appears on the car's display, your car supports CarPlay, and this product is compatible.

iPhone must run iOS 10 or later.

If you're still unsure whether your car supports wired CarPlay, contact your car dealer for assistance.

■ How to check if your car has wired Android Auto?

Connect your Android phone to the car's USB port using the original data cable. If the Android Auto icon or a related prompt appears on the car's display, your car supports Android Auto, and this product is compatible.

Android phone must run Android 11 or later.

If you're still unsure whether your car supports wired Android Auto, contact your car dealer for assistance.

Package Contents

- Wireless Car Adapter
- User Manual
- USB-A to Type-C adapter

Included only with USB-A version products

If the actual items differ from the list above, the contents of the received package shall take precedence.

Parts Names & Functions

If the illustration differs from the physical product, the actual product received shall prevail.

1. Smart Button

- Short press: Disconnect the currently connected phone.
- Long press for 10s: Clear all data and restore factory settings.

2. LED

- Solid Red: Power on
- Flashing Blue: Successful car communication
- Solid Blue: Successful phone connection
- Alternating Red, blue and green: System updating
- Solid White: system update completed
- Flashing Red: system update error
- Flashing White: Reset completed

3. Power Interface (supports 5V voltage) - for power supply and data transmission

4. USB-A to Type-C adapter

Included only with USB-A version products.

Key Features

1. Convert the original wired CarPlay to wireless CarPlay.
2. Convert the original wired Android Auto to wireless Android Auto.

3. Auto Reconnection

- When the Bluetooth and Wi-Fi of the last used phone are enabled, the product will automatically connect to that phone.
- The product can remember the last two connected phones and will prioritize connecting to the last used phone by default. If it fails to connect within the reconnection time limit (15-30 seconds), it will automatically attempt to connect to the other phone.

4. One-click Disconnect and Switch

Short press the Smart Button to disconnect the currently connected phone. If the product has remembered two phones, it will automatically connect to the other phone after disconnection.

The other phone's Bluetooth and Wi-Fi need to be enabled.

How to correctly install the product?

Insert The Product into the USB port designated for wired Apple CarPlay/wired Android Auto in your vehicle(if there are multiple USB ports).

How to use Wireless CarPlay/Wireless Android Auto?

■ How to Connect the Phone?

1. Turn on the phone's Bluetooth and click the product's Bluetooth name.
2. After successful pairing, please agree to all requests from CarPlay/Android Auto.
3. Wireless CarPlay/Wireless Android Auto connection is successful.

The product will automatically recognize iPhones or Android phones. When switching phones, the product will automatically restart once.

■ How to switch phones?

1. Enter the control center of the currently connected phone and turn off Wi-Fi and Bluetooth.
2. After successfully disconnecting, turn on the Bluetooth of the other phone and click this product's Bluetooth name to pair.

Instructions for System Update and Issue Reporting (iPhone Users)

■ System Update

1. Update when CarPlay is connected.
 - 1.1 Open the phone browser and enter the URL: <http://192.168.1.101>.
 - 1.2 If an update is available, click "Update".

2. Update when CarPlay is disconnected.

The product must be powered on. It can be connected to a 5V car power supply, or a portable power bank or power adapter may be used as an alternative.

- 2.1 Connect your phone to the Wi-Fi network [CAR2-XXXX].
- 2.2 Enter the password 88888888 and confirm.
- 2.3. Open your phone's browser and enter the URL: <http://192.168.1.101>.
- 2.4. If an update is available, click the "Update" .

Do not turn off the power during the update.

After the update is completed (LED turns white), please unplug the adapter.

After the update, please re-pair your phone.

■ Report Issues

When a problem occurs, use your smartphone to access the software update page at [<http://192.168.1.101>] to report the issue.

The product must be plugged into the car system for issue reporting to work.

- 1.Fill in the form and submit.
2. Take a screenshot of this page and send it to your seller.

Instructions for System Update and Issue Reporting (Android Users)

■ System Update

Android users must disconnect Android Auto before starting the upgrade.

The product must be powered on. It can be connected to a 5V car power supply, or a portable power bank or power adapter may be used as an alternative.

1. Find the WiFi Direct (or WLAN Direct) function on your Android phone.

The path to access WiFi Direct varies by phone. For example, on Google Pixel 6 Pro: Settings > Network & Internet > Network Preferences > Wi-Fi Direct.

2. Click [CAR2-XXXX] in the WiFi Direct list.

3. Wait for the connection to succeed before performing other operations.

4. Open the phone browser and enter the URL: <http://192.168.1.101>.

5. If an update is available, click "Update".

Do not turn off the power during the update.

After the update is completed (LED turns white), please unplug the adapter.

After the update, please re-pair your phone.

■ Report Issues

When a problem occurs, use your smartphone to access the software update page at [<http://192.168.1.101>] to report the issue.

The product must be plugged into the car system for issue reporting to work.

Android users must disconnect Android Auto before accessing the page to submit a report.

1. Fill in the form and submit.

2. Take a screenshot of this page and send it to your seller.

FAQ

1. What should I do if there's no response after installing the product?

(1) Check if your car supports wired CarPlay/wired Android Auto. Please refer to the "Is this product compatible with my car?" section in the manual for verification.

(2) If confirmed that your car supports wired CarPlay/wired Android Auto, reset the car's infotainment system. Then use the original phone data cable to connect your iPhone/Android phone to the car's USB port to start wired CarPlay/wired Android Auto, and reinstall this product.

2. What should I do if the product cannot connect or frequently disconnects?

(1) Reset this product by long pressing the "Smart Button" for 10s to clear all data and restore factory settings, or click "Restore Factory Settings" on the same update page: <http://192.168.1.101>. Also, delete the Bluetooth and Wi-Fi connection records on your phone, and clear the cache data of CarPlay/Android Auto and Google services, then reconnect your phone to this product.

(2) If the first step doesn't resolve the issue, please refer to the "Instructions for System Update and Issue Reporting" to update the product system to the latest version, then reconnect this product.

(3) If the first and second steps don't resolve the issue, reset the car's infotainment system. Then use the original phone data cable to connect your iPhone/Android phone to the car's USB port to start wired CarPlay/wired Android Auto, and reinstall and reconnect this product.

3. What should I do when the product's Bluetooth and Wi-Fi connect successfully, but cannot enter the CarPlay/Android Auto system?

(1) If your car only supports wired CarPlay, please use an iPhone to connect with the product; if your car only supports wired Android Auto, please use an Android phone to connect with the product.

(2) If the first step doesn't resolve the issue, clear the Bluetooth, Wi-Fi, CarPlay/Android Auto and other car connection records on your phone, then reconnect your phone to this product.

4. What should I do if there's lag in the product connection?

(1) On the same update page <http://192.168.1.101>, you can adjust "Delayed start" by switching to Model1 or Model2 and clicking OK, trying each one sequentially.

(2) If the first step doesn't resolve the issue, please refer to the "Instructions for System Update and Issue Reporting" to update the product system to the latest version, then reconnect the product.

(3) If the first and second steps don't resolve the issue, reset the car's infotainment system. Then use the original phone data cable to connect your iPhone/Android phone to the car's USB port to start wired CarPlay/wired Android Auto, and reinstall and reconnect this product.

5. What should I do if there's audio stuttering or noise during product use?

(1) On the same update page <http://192.168.1.101>, you can adjust "Audio streaming mode" by switching to Model1 or Model2 or Model3, trying each one sequentially.

(2) If the first step doesn't resolve the issue, please refer to the "Instructions for System Update and Issue Reporting" to update the product system to the latest version, then reconnect the product.

If all the above steps cannot resolve the problem, please refer to the "Report Issues" to upload log files, specify the car model, year, fault phenomenon, and car VIN code, and send the screenshot of the successful upload to your seller.
