

Bed Assembly

GUIDE

What's Included:

Please take care when unpacking. Your bed components are carefully packaged using repurposed materials from our furniture-making process—a sustainable choice that helps protect each piece in transit.

YOU WILL FIND:

- **3 UPHOLSTERED BED RAILS**
 - 2 Side rails with wood feet and metal L-brackets
 - 1 Foot rail
- **1 UPHOLSTERED HEADBOARD**
- **4 SUPPORT SLATS**
 - King slats have attached support legs
- **HARDWARE PACKAGED IN BLUE BAGS**
 - Short screws connect the rails to each other and to the headboard
 - Long screws are used to attach the slats

Note: All of our beds are designed for use with a box spring or foundation.

- For the 9" side rails, use a 5–6" box spring (6" sits flush with the rails; 5" sits slightly below)
- For the 11" side rails, use a 7–8" box spring (8" sits flush with the rails; 7" sits slightly below)

WHAT YOU'LL NEED

Power drill or
screwdriver

2 people
recommended

Assembly Instructions

STEP 1: ATTACH SIDE RAILS TO THE FOOT RAIL

- Identify the side rails' head and foot ends using the applied labels.
- Use the pre-drilled holes and short screws to secure the side rails to the foot rail.

Note: The foot rail is designed to overhang the bed frame by approximately 1 inch—this is intentional, allowing it to rest neatly on the ledge.

STEP 2: ATTACH SIDE RAILS TO THE HEADBOARD

- Align the side rail edge with the inside welt of the headboard.
- Ensure the foot of the side rail rests flat against the floor.
- Use the pre-drilled holes and short screws to secure the side rails to the headboard.

STEP 3: INSTALL SUPPORT SLATS

- Align and secure the slats using the pre-drilled holes and long screws provided.
