

Grill Gauge Fit Check Model

1

Insert the probe into the **Giant Grill Gauge** model. Press firmly until the top of the probe is flush with the face of the Gauge.

2

Insert the **GGG/Probe assembly** into the **Heat Shield/Deflector**. Ensure the **GGG** is flush with the face of the **Heat Shield**.

3

Place the assembled parts into the thermometer hole on your grill lid. If the probe does not fit, drill the hole to the correct size. Refer to the **Grill Gauge Fitment Guide** for detailed instructions.

4

For a more permanent setup, glue the parts together as needed.
