

BECAUSE KEEPING YOU SAFE IS OUR TOP PRIORITY...

*Take a moment to read all safety warnings and instructions.
The protective equipment must only be used for the applications it is intended for.*

We care a lot about your safety and satisfaction. That's why we've put together a few precautions for you to follow while using your NoCry Forestry Helmet Kit.

- ✓ The NoCry helmet is constructed to absorb blows and distribute the impact from falling objects that hit or penetrate the helmet shell from above, but not from the sides. Always be careful when assessing situations and environments where you are planning to use the helmet kit. Ensure that the helmet, earmuffs and visor selected are the most suitable means of protection from potential threats you will be exposed to in your work environment. Avoid direct contact with electric wires.
- ✓ For the helmet to provide the intended protection it must be adjusted to the user's head. Adjust the headband size using the dial ratchet until the helmet feels comfortable and snug on your head. Please bear in mind that the headband should not be fastened too tightly.
- ✓ The earmuffs can be rotated and placed on the back of the helmet when not in use. **IMPORTANT!** The noise attenuation capability of the hearing protectors is considerably reduced if the hearing protectors are not used and maintained according to the instructions. The fitting of hygiene covers to the cushions may affect the acoustic performance of the earmuffs. Please note that the earmuffs can get impaired due to use and aging. Check the hearing protectors regularly for damages.
- ✓ The visors can be attached and detached, giving you the ability to adjust the helmet to your needs. **Do not try to attach both visors to the helmet at the same time. CAUTION!** The mesh visor is no substitute for protective goggles or safety goggles. It does not provide protection against splashes of molten metal, hot objects, splashes of liquid or electrical risks. Be aware that materials that may come into contact with the user's skin can cause allergic reactions in especially sensitive people.
- ✓ The helmet kit is not fire or chemical resistant. Do not store the equipment in places where it can be exposed to extreme sunlight or in places with high humidity. Protect the equipment from external impact during transport. Keep the hearing protectors clean and dry and store them at room temperature.
- ✓ You can remove minor dirt/stains from your helmet kit by using a soft brush. If the dirt/stains are stubborn please use a washcloth in lukewarm water with a neutral detergent solution. Rinse with clean water afterwards. Never clean any part in a washing machine.
- ✓ Always ensure the protective equipment is properly assembled, fitted and maintained according to the instructions. The product must not be modified. A damaged or modified equipment should always be replaced. Always use genuine accessories.
- ✓ At the first signs of wear, blows, damages or aging of the material, the helmet's shell or suspension must be replaced to guarantee the helmet's protective capabilities. **Inspect for damage regularly before each use.** A protective helmet, earmuffs or visor that shows signs of damage - (e.g. cracks or scratches) that might reduce its protective capabilities - must be disposed of. In case of an accident or incident, the helmet must be disposed, even if it does not have any visual damage.
- ✓ Hearing protection must always be worn in noisy environments and the earmuffs should be fitted prior to entering the noise area. **WARNING!** Hearing protectors can block out warning cries, alarms or other important signals. Always pay extra attention to surroundings when wearing hearing protectors.

If the forestry helmet kit you received is not a great fit or you have any questions or concerns, feel free to contact our customer support at wecare@nocry.com. We're always here to help.

HOW DO YOU LIKE YOUR NEW NOCRY FORESTRY HELMET?

ASSEMBLY INSTRUCTIONS

Follow the steps below to assemble your Forestry Helmet.

N.B.: We have also created a helpful **how-to assembly video**, together with online instructions and larger images. You can find them at www.nocry.com/instructions or simply by scanning the QR code on the side.

1. Take all parts out of their original packaging and place them on a flat, soft working surface.

2. The clear polycarbonate visor arrives with a thin plastic film on both sides. Remove the film from both sides.

3. Attach the ear muffs by sliding their connectors into the top of the cap slots on each side of the helmet until they click into place. Each ear muff can be attached to either side. Rotate and place the ear muffs in their resting position on the back side of the helmet to allow for easy further assembly.

4. Affix the visor support by sliding its ends into the earmuff connector slots on both sides of the helmet. The support can be locked into three different positions, allowing you to adjust the depth position of the visor.

5. Choose the visor you wish to attach and fasten it to the visor support by aligning the slots on top of the visor with the locking system. Turn the black knobs to lock the visor into place. Make sure the visor can be raised and lowered freely and is securely locked in place.

**The images used are for illustrational purposes. Your forestry helmet color may vary.*
