#### **Section 4. FIRST AID MEASURES**

---

**EYES:** In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.

**SKIN:** Remove all contaminated clothing. Wash clothing before reuse. Cleanse affected areas thoroughly by washing with mild soap and water. Get immediate medical attention if symptoms occur.

**INHALATION:** Remove person to fresh air. If symptoms develop and persist, get medical attention.

**INGESTION:** Do not induce vomiting. Keep individual calm. Get medical attention immediately.

## **Section 5. FIRE FIGHTING MEASURES**

---

Extinguishing media: Water, dry chemical, CO<sub>2</sub>. Universal type foam.

Use water to keep fire exposed containers cool and avoid increase in pressure that can cause the release of the drum lid.

High temperatures and fire conditions may cause rapid and uncontrolled polymerization, which can result in explosions and the violent rupture of storage vessels or containers. Avoid the use of a stream of water to control fires since frothing can occur.

Hazardous combustion products: Oxides of carbon, Oxides of nitrogen, irritating organic vapors, toxic fumes.

## **Section 6. ACCIDENTAL RELEASE (SPILL MEASURES)**

---

Spontaneous polymerization can occur. Eliminate ignition sources. Use eye and skin protection. Place leaking containers in a well-ventilated area. Dike and recover large spills. Soak up small spills with inert solids (such as vermiculite, clay) and sweep/shovel into disposal container. Wash spill area with strong detergent and water solution; rinse with water, but minimize water use during clean-up. Do not flush into sewer! US Regulations (CERCLA) require reporting spills and releases to soil, water and air in excess of reportable quantities. The toll-free number for the US Coast Guard National Response Center is (800) 428802. EU Regulations require the consultation of Directive 98/24/EC. Dispose and report per regulatory requirements if necessary. Prevent product from entering drains or open waters.

## **Section 7. HANDLING AND STORAGE**

---

**Handling:** Keep containers tightly closed. Keep containers cool, dry, and away from source of ignition. Avoid prolonged exposure to light. Remove all contaminated clothing, shoes, belts and other leather goods immediately. Incinerate leather goods (including shoes). Wash contaminated clothing thoroughly before reuse. Wash skin thoroughly with soap and water after handling. Use only with adequate ventilation. Solvents should not be used to clean skin because of increased penetration potential.

**Storage:** Do NOT use localized heat sources such as band heaters to heat/melt product. Do NOT use steam. Hot boxes or hot rooms are recommended for heating/melting material. The hot box and/or room should only be set to a maximum temperature of 60°C/140°F. Do not overheat, this may compromise product effectiveness and should be avoided. Refrain from multiple reheating of product, this will also diminish the quality of the product. Store in a cool, dry place, away from heat and all types of light. Store at or below temperatures 100°F/38°C but

above the product's freezing point. If no freezing point is given, keep above 32°F/0°C at all times.

## Section 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

**General:** To identify additional Personal Protective Equipment (PPE) requirements, it is recommended that a hazard assessment in accordance with the OSHA PPE Standard (26CFR1910.132), or European Standard EN166 be conducted before using this product. Provide eye wash stations and safety showers. Wear impervious clothing to prevent ANY contact with this product, such as gloves, apron, boots, or whole-body suit. Nitrile rubber is better than PVC. Local exhaust ventilation is recommended when general ventilation is not sufficient to control airborne contamination below occupational exposure limits.

**Respiratory Protection:** Use OSHA-approved respirator if there is potential to exceed exposure limit(s). If this material is handled at elevated temperatures or under mist-forming conditions, without engineering controls, an OSHA-approved respirator must be used.

**Eye/Face Protection:** Wear chemical splash goggles.

**Skin Protection:** Wear impermeable gloves and protective clothing.
