

Extended Minimalist Index Validation - 06.01.25

UMANA
Footwear Analysis Biomechanical Center

REPORTS
that the FOOTWEAR

KOOPS - VENAN

has an extended minimalist index of

94,6%

and obtains a cataloging of
BAREFOOT FOOTWEAR

taking into account all the parameters involved (specified in the technical annex).

UMANA guarantees the accuracy and objectivity of the tests in the laboratory, which have been carried out under strict study protocols and which allow obtaining values for the analytical parameters in a direct instrumental manner.

Xavier Alfonso Cornes
