Freshen Up Your Peepers for Spring

Crunchi Shattered Mascara opens up your eyes dramatically and elongates the lashes with a glossy, high pigment finish. The clean line contains no nasties or GMOs, only natural lash-extending ingredients to foster their power. Build up the amount by layering applications according to your mood. The proven formula enhances lash adherence so you don't have to worry about rain or long hours outside. To add volume and lift your lashes, this buildable formula works and goes beyond. Throw those sticky falsies away and see how you can reach the same result with this high definition, luxurious mascara. Another thing we love: the mascara is packaged in a glass tube to help stop plastic dependency and waste.
