Item	Function
1	Charging Case LED Light
2	Charging Port
3	Multifunctional (MFB)/Command Button
4	Earphone LED
5	Magnetic Charging Pin
6	Earphone Mic

Charging your Pump Air Lite 2

1. Open the charging case

2. Place earbuds in case

3. Close the lid

Charging your Pump Air Lite 2 cont'd

Use the supplied charging cable. Please use only 5V/1A chargers.

The Pump Air Lite 2 takes 2 hrs for a full charge.

The Pump Air Lite 2 charging case takes 2.5 hrs for a full charge. The charging case should charge the earbuds 4 times.

Charging the case

The charging case features a dual-color LED that indicates the charging status and battery level.

While charging, the LED will turn solid white and periodically flash red to indicate the charging progress:

- 1 flash: 25% charged
- 2 flashes: 50% charged
- 3 flashes: 75% charged
- 4 flashes: 76-100% charged

Once the LED turns solid red, the case is fully charged and can be unplugged.

Checking Case Battery Level When Not Charging

To check the battery level when the case is not charging, remove both earbuds and place them

back into the case. The LED will periodically flash red to indicate the current charge level, with the number of flashes as described above.

Charging the Earbuds

Each earbud has an LED that will light up solid white during charging. The LED will turn off once the earbuds are fully charged. Please note that the left and right earbuds may charge at different rates.

Let's Get Started | Pairing to your phone

1. Remove both earbuds from the charging case and place them in your ears.
2. When the earbuds are turned on for the first time, they will automatically enter Bluetooth pairing mode.
3. After a few seconds, you will hear the words *"Bluetooth pairing."*
4. On your phone, search for the Bluetooth device named *'BlueAnt Pump Air Lite2'* and select it to pair. You should hear, *"Connected."*
5. The earbuds will automatically reconnect to your phone whenever you remove them from the charging case. They will disconnect and power off when placed back in the case.

Pairing with a New Device

- If you need to pair the earbuds with another phone, first turn off Bluetooth on the currently connected phone.
- The earbuds will announce, *"Disconnected,"* followed shortly after by *"Bluetooth pairing."*
- On the new phone, select *'BlueAnt Pump Air Lite2'* to complete the pairing.

N.B. If your earbuds are showing up as two separate devices, it means they have become disconnected from each other. Please follow the instructions on *Page 10* to re-sync them together.

Let's Get Started | Fit

To ensure the best sound, you need the best fit. Having the best fit creates a seal and enhances the bass performance.

The diagram on the right, is how the earbuds should sit in your ear. There are 3 sizes of ComfortSealTips - **Small, Medium and Large**.

To get the most out of the earbuds, it's best to try out each of the sizes to get the best fit.

Button Functions

Listen

▶|| Tap once to Play/Pause

▶▶ Double tap the Right earbud to Skip Forward

◀◀ Double tap Left earbud to Skip Back

Talk

Tap once to Answer Call

Tap once to End Call

Press and hold to Reject Call

Siri/Google

Tap MFB three times to
Activate/Cancel Siri/Google

Volume

When music is playing or on a call

Press and hold the MFB on the Right earbud
to increase volume

Press and hold the MFB on the Left earbud
to decrease volume

Power

1. When you remove the earbuds from the charging case, they will automatically *power on* and try to reconnect to the last phone they were connected to.
 2. When you place the earbuds into the charging case, they will automatically *power off*.
 3. To *power on* without the charging case, *press and hold* the MFB for 2s.
To *power off* without the charging case, *press and hold* the MFB on either earbud for 6s.
 4. To pair without the charging case from off, *press and hold* the MFB on one earbud for 5s, and then pair with your phone. Then *press and hold* MFB on the other earbud for 2s to power it on.
- The earbuds announces when the battery is low, when there is about 30 mins of play time left.
 - The earbuds features an iPhone battery meter.
 - **Mono Operation:** It is possible to use the earbuds as a mono headset. Simply remove one of the earbuds from the charging case.

How to Re-Sync Your Pump Air Lite 2 Earbuds

If your earbuds become disconnected from each other and show up as two separate devices on your phone, or if you are replacing a lost earbud, follow these steps to re-sync them:

1. *Remove any existing pairing* of the earbuds from your phone.
 - You should not have any 'BlueAnt Pump Air Lite2' showing up under paired devices on your phone.
 - Ignore anything showing up as an available device at this point.
2. Important: ensure your charging case is fully charged (the battery indicator LED is periodically flashing red 4 times).
3. *Place both earbuds* back into the charging case.
 - The LED on the earbuds should turn *solid* white, indicating that they are charging.
 - If the LED is flashing, adjust the earbud to ensure proper contact until the LED is *solid*.
4. Within the first few seconds of putting them in the case (with a solid white LED), *press* and *hold* the MFB on both earbuds for *10s* until you see both LEDs flash quickly *twice*.
 - The LED may turn off during the 10s if the battery was already fully charged.
 - If you are having trouble achieving the 2 fast flashes, make sure you are starting with a *solid* white LED. Sometimes,

How to Re-Sync Your Pump Air Lite 2 Earbuds cont'd...

it may require leaving the earbuds out of the case for 10 minutes to deplete the battery a little so they don't switch off quickly after being inserted back into the case.

- If only *one bud flashes 2 times*, remove and re-insert both buds, then restart the process.
5. *Once both earbuds flash 2 times*, remove them from the case, wait 5s for re-syncing to occur, and then scan for BT devices on your phone. You should now see a single 'BlueAnt Pump Air Lite2' which you can connect to.

Legal

PLEASE PROTECT YOUR EARS. BlueAnt devices can reach volumes above 100 decibels. Prolonged use at high volumes may affect your hearing capacity and may result in noise induced hearing loss (NIHL). Please read the enclosed safety card for information about the safe use of BlueAnt products.

SAFETY INFORMATION AND WARRANTY TERMS

Important Safety Information

**PLEASE READ THIS ENTIRE DOCUMENT
CAREFULLY, BECAUSE IT CONTAINS
IMPORTANT INFORMATION ABOUT THE SAFE
USE OF BLUEANT DEVICES**

**WARNING - PROTECT
YOUR HEARING**

**BLUEANT DEVICES CAN
REACH VOLUMES ABOVE
100 DECIBELS.**

ONLY CHARGE WHEN DEVICE IS CLEAN AND DRY

**PROLONGED USE AT HIGH VOLUMES MAY AFFECT YOUR HEARING CAPACITY AND MAY RESULT IN NOISE INDUCED HEARING LOSS (NIHL).
TURN OFF THE POWER TO YOUR DEVICE WHEN NOT IN USE.**

Please ensure that the device and any associated components such as ear gels or chargers, are stored safely and that any packaging or unwanted contents are disposed of thoughtfully. Do not place the product on the floor or leave it in a place, where young children could access it, or someone could trip over it

Using Ear Gels

Your BlueAnt earbuds will come with eargels or foam tips that are designed to provide a secure fit in your ear, while providing high quality audio

- Ear gels and tips are designed to sit comfortably in your ear and should not be forced into your ear at any time. If you have trouble fitting the ear gel or

foam, please refer to the owner's manual for correct insertion and usage information.

Always make sure that the ear gel or foam is fitted securely to your device, before placing it in your ear.

WARNING

**NOTE THAT NON COMPLIANCE,
MISUSE OR FORCING THE EAR
GEL OR FOAM MAY CAUSE
DAMAGE TO YOUR EAR CANAL
EARDRUM, OR MAY OTHERWISE
CAUSE BODILY HARM**

Care and Handling

Your BlueAnt Bluetooth device is a precision engineered instrument. To ensure its ongoing performance, you should look after it as you would any quality consumer electronic product, and use it in accordance with the instructions.

BlueAnt recommends that you take the following precautions.

- Avoid leaving your device in direct sunlight, such as on the dashboard or console of a car or truck. Do not leave your device unattended in your vehicle.
- Do not leave your device, or use your device, in any area where the temperature may exceed 60 degrees Centigrade (140 degrees Fahrenheit), such as inside a closed car on a hot day. Remember that on a hot day, the temperature inside a closed car may be significantly higher than the outside air temperature.

- Do not leave your device, or use your device, in any area exposed to humidity, dust, soot, other foreign objects, smoke, or steam as this may cause your device to malfunction.
- Do not use any household or industrial grade detergents or cleaners to clean your device. If your device becomes dirty or smeared, in most instances, a wipe with a dry or slightly damp cloth should be sufficient to clean it.
- Do not leave your Bluetooth device, plugged into a wall or car charger for long periods after it is fully charged. BlueAnt does not recommend long periods of continued charging.
- Before charging your BlueAnt device, make sure that the AC outlet, adaptor and cable are not damaged. If you notice any abnormalities, seek advice from a qualified professional.
- If travelling internationally, ensure that your BlueAnt wall or car power adapter is approved for use in the country where you plan to use it and that the adapter voltage is suited to the local power supply.
- Should a fault develop with your BlueAnt product, contact BlueAnt for advice on how to proceed. Do not attempt to repair or alter any BlueAnt product yourself.

Approved Accessories

The use of accessories not approved by BlueAnt, including but not limited to batteries, antennas, wall adapters, car chargers, ear gels, foam tips and convertible covers, may cause your BlueAnt device to malfunction, or in the case of non-approved electrical accessories, may cause the device to exceed RF energy exposure guidelines. Use only 5V/1A chargers.

Use of non approved accessories will void your device's warranty. For a list of approved BlueAnt accessories, visit our website [**www.blueantwireless.com**](http://www.blueantwireless.com)

Electromagnetic Interference

Nearly every electronic device is susceptible to electromagnetic interference (EMI) if inadequately shielded, designed, or otherwise for electromagnetic compatibility.

Similar to a mobile phone, your BlueAnt device is a low power transmitter/ receiver and is covered by regulations in any facility where posted notices instruct you to do so. These facilities may include hospitals or health care facilities that may be using equipment that is sensitive to external RF energy.

- When instructed to do so, turn off your BlueAnt device when you board an aircraft. Any use of a mobile device must be in accordance with applicable laws, regulations and airline crew instructions.

- Some Bluetooth devices may interfere with some hearing aids. In the event of such interference, you may want to consult your hearing aid manufacturer or physician to discuss alternatives.
- If you use any other personal medical device, consult the manufacturer of your device to determine if it is adequately shielded from RF energy. Your doctor or physician may be able to assist you in obtaining this information.
- If you are in doubt whether your BlueAnt device or mobile phone can be safely turned on or used, please consult an authorised person in the location you want to use your BlueAnt device. If no authorised person is available, or you remain uncertain, BlueAnt recommends that you turn off your Bluetooth device and any mobile phones unless they are required in an emergency situation.

BlueAnt Limited Global Warranty

This product is covered by BlueAnt's limited global warranty for one (1) year from the date of purchase, or if later, the date of delivery.

Please refer to the **warranty.blueantwireless.com** for full terms and conditions.
