- Press once to **play, pause, answer or end a phone call**
-  Press twice to **activate Siri or other voice control software**
-  Press and hold **2s** to **reject incoming calls**
- Press and hold to **power ON or OFF**

- Press once to **decrease volume**
- Press and hold to **skip back**

HOW TO CONNECT BOOM MICROPHONE

The Antlings have the built-in microphone for calls and chatting, or you can use the supplied boom microphone

The boom microphone helps your child to make calls, even when there is background noise.

1 Locate the Microphone Port

Find the small circular input jack on the left earcup of the Antlings headset.

2 Insert the Boom Microphone

Gently align the microphone plug with the port and push it in until it clicks or feels securely connected.

3 Adjust the Mic Arm

Bend the flexible boom arm to position the microphone near your mouth (about 2 cm away) for optimal voice clarity.

4 Check Your Connection

The Antlings will automatically switch between from the internal microphone to the boom microphone when it is plugged in, and switch back to the internal microphone when you remove the boom microphone.

AUDIO SHARING

Share between two Antlings headphones

- 1 Connect the **FIRST** headphone to your device

- 2 The **SECOND** headphone should be powered off. Press and hold the power button for 5s, until the LED indicator is flashing blue/red

AUDIO SHARING CONT'D...

Share between two Antlings headphones

- 3 On the **SECOND** headphone, **press** the power button **3 times**. The LED indicator will **flash blue**

- 4 On the **FIRST** headphone, **press** the **power button 3 times** to share

SAFE HEARING

Press and hold the +/- buttons for **3s** to activate **Travel Mode** (94dB max).

Everyday use defaults to 85dB max.

USB-C WIRED LISTENING MODE

Seamless connection for superior sound quality

- You can use the included USB-C cable for lossless audio playback, if your source device supports USB Audio. The play and volume controls will work as normal.
- The Antlings will automatically power off when the USB-C cable is unplugged.
- The Antlings will continue to charge while being used in wired USB mode.

MULTI-POINT CONNECTION

How to use Multi-point Connectivity

Multi-point connectivity allows the Antlings to connect with two devices simultaneously, so you can easily switch between them

CHARGING

To charge your Antlings, use the included USB-C cable and plug them into a power source. When the Antlings is fully charged, all the lights will turn off.

Light will flash red
when battery is low

Light will be solid
red when charging

When fully charged,
light will turn off

Connect to computer
or USB 5V 1A (or less)
output device.

FACTORY RESET

Please delete the pairing information from your device before you factory reset your Antlings

- 1 When power is off, **press** and **hold** the power button for **5s** until the LED flashes **blue** and **red**

- 2 Keep holding +/- buttons simultaneously for **10s** until you see the **red** light flashing **3 times**, and then solid red for **2s**. The Antlings will power **OFF** automatically

SAFETY INFORMATION AND WARRANTY TERMS

Important Safety Information

**PLEASE READ THIS ENTIRE DOCUMENT
CAREFULLY, BECAUSE IT CONTAINS
IMPORTANT INFORMATION ABOUT THE
SAFE USE OF BLUEANT DEVICES**

**PROLONGED USE AT HIGH
VOLUMES MAY AFFECT YOUR
HEARING CAPACITY AND MAY
RESULT IN NOISE INDUCED
HEARING LOSS (NIHL).
TURN OFF THE POWER TO

IN USE.**

Please ensure that the device and any associated components such as chargers, are stored safely and that any packaging or unwanted contents are disposed of thoughtfully. Do not place the product on the floor or leave it in a place, where young children could access it, or someone could trip over it

Care and Handling

Your BlueAnt Bluetooth device is a precision engineered instrument. To ensure its ongoing performance, you should look after it as you would any quality consumer electronic product, and use it in accordance with the instructions. BlueAnt recommends that you take the following precautions.

- Avoid leaving your device in direct sunlight, such as on the dashboard or console of a car or truck. Do not leave your device unattended in your vehicle.
- Do not leave your device, or use your device, in any area where the temperature may exceed 45 degrees Centigrade (113 Degrees Fahrenheit), such as inside a closed car on a hot day. Remember that on a hot day the temperature inside a closed car may be significantly higher than the outside air temperature.
- Do not leave your device, or use your device, in any area exposed to humidity, dust, soot, other foreign objects, smoke, or steam as this may cause your device to malfunction.

- Do not use any household or industrial grade detergents or cleaners to clean your device. If your device becomes dirty or smeared, in most instances, a wipe with a dry or slightly damp cloth should be sufficient to clean it.
- Do not leave your Bluetooth device, plugged into a wall or car charger for long periods after it is fully charged. BlueAnt does not recommend long periods of continued charging.
- Before charging your BlueAnt device, make sure that the AC outlet, adaptor and cable are not damaged. If you notice any abnormalities, seek advice from a qualified professional.
- If travelling internationally, ensure that your BlueAnt wall or car power adapter is approved for use in the country where you plan to use it and that the adapter voltage is suited to the local power supply.
- Should a fault develop with your BlueAnt product, contact BlueAnt for advice on how to proceed. Do not attempt to repair or alter any BlueAnt product yourself.

Approved Accessories

The use of accessories not approved by BlueAnt, including but not limited to batteries, antennas, wall adapters, car chargers, ear gels, foam tips and convertible covers, may cause your BlueAnt device to malfunction, or in the case of non-approved electrical accessories, may cause the device to exceed RF energy exposure guidelines. Use only 5V/1A chargers.

Use of non approved accessories will void your device's warranty. For a list of approved BlueAnt accessories, visit our website www.blueantwireless.com

Electromagnetic Interference

Nearly every electronic device is susceptible to electro-magnetic interference (EMI) if inadequately shielded, designed, or otherwise for electromagnetic compatibility.

Similar to a mobile phone, your BlueAnt device is a low power transmitter/receiver and is covered by regulations in any facility where posted notices instruct you to do so. These facilities may include hospitals or health care facilities that may be using equipment that is sensitive to external RF energy.

- When instructed to do so, turn off your BlueAnt device when you board an aircraft. Any use of a mobile device must be in accordance with applicable laws, regulations and airline crew instructions.
- Some Bluetooth devices may interfere with some hearing aids. In the event of such interference, you may want to consult your hearing aid manufacturer or physician to discuss alternatives.
- If you use any other personal medical device, consult the manufacturer of your device to determine if it is adequately shielded from RF energy. Your doctor or physician may be able to assist you in obtaining this information.
- If you are in doubt whether your BlueAnt device or mobile phone can be safely turned on or used, please consult an authorised person in the location you want to use your BlueAnt device. If no authorised person is available, or you remain uncertain, BlueAnt recommends that you turn off your Bluetooth device and any mobile phones unless they are required in an emergency situation.

ONLY CHARGE WHEN DEVICE IS CLEAN AND DRY

BlueAnt Limited Global Warranty

This product is covered by BlueAnt's limited global warranty for one (1) year from the date of purchase, or if later, the date of delivery.

THANK YOU FOR CHOOSING A BLUEANT PRODUCT

Caring for the Environment by Recycling

Do not dispose of Bluetooth accessories, such as chargers or headsets, with your household waste. In some countries or regions, collection systems are set up to handle electrical and electronic waste items, and may prohibit or restrict how such items are disposed of. Check the laws and regulations for your areas to determine how to properly dispose of such items. Contact your regional authorities for more details.

AUSTRALIAN CONSUMER LAW

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if goods fail to be of acceptable quality and the failure does not amount to a major failure.

FCC INFORMATION

FCC ID: VHF-BLUEANT-AT

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Important: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help

FCC RF Exposure Information

Scanner: The device complies with FCC radiation exposure limits set forth for an uncontrolled environment.
End user must follow the specific operating instructions for satisfying RF exposure compliance.

Wireless frequency range: 2402~2480MHz
RF output power: <0dBm
