ark Tamo™ Pro

The maximum security push-button key safe with enhanced security features

ark Tamo™ Pro has been designed following extensive customer consultation by our UK-based engineers, resulting in a mechanical key safe that combines unparalleled levels of code and construction security with user-focused convenience.

Built to Secured by Design (SBD) police preferred specification, ark Tamo™ Pro is the maximum security push-button key safe, with 9.7m code combinations, additional hardened anti-saw pins and a stainless steal internal vault, it is the most secure in its class.

The ark Tamo Pro has undergone independent attack testing to achieve LPS1175 Issue 8 A1 attack security rating from LPCB (Loss Prevention Certification Board).

With replaceable battery illumination module, easy press buttons and simple to follow installation instruction, the product is designed for ease of use.

Unparalleled security

The **ark Tamo™ Pro** is built with strengthened zinc alloy which is corrosion and attack resistant, reinforced by a stainless steel internal liner. The triple wall construction, combined with hardened anti-saw pins, anti-penetration back and coned anti-drill hinge pins delivers unrivalled security.

The **ark Tamo™ Pro** features a world-first multi-push locking mechanism, engineered for enhanced reliability and safety. The patented multi-push technology allows each button to be used up to four times to create a more memorable code, resulting in over 9.7 million high-security code combinations—unmatched by any other mechanical key storage device.

Illuminated keypad and vault

ark Tamo™ Pro features a keypad with ten large buttons made from toughened plastic. Each button is backlit by the inner lighting module for maximum visibility, once activated. An internal light also illuminates the inner compartment for ease of use.

How can **ark Tamo™ Pro** be used?

ark Tamo™ Pro has many applications including access for at home healthcare and in-home services such as cleaners or dog sitters, remote sites, holiday homes, property management, equipment storage, after-hours delivery, alarm or emergency access, as well as providing secure storage for spare keys and emergency entry if you are locked out or have lost your keys. The illumination module means **ark Tamo™ Pro** is particularly suited to users who wish to use the key safe in all lighting conditions. The large, easy-press backlit buttons make access quick and easy for people who may be less-dextrous.

Installing **ark Tamo™ Pro**:

- 4x Security Standards Screws, included for mounting the key safe on brickwork, stone and single skin walls.
- 4x XL Security Screws & Wall Plugs, included for mounting on brickwork, concrete, stone and rendered walls.
- We recommend using the XL Security Screws & Wall Plugs as the preferred fixing solution for brick, concrete and stone surfaces. Do not use them for installing on single walls and wood*.
- A full instruction manual and additional resources are provided and can be accessed digitally via the built-in QR code on the front of the key safe.

*It should be noted the security certification of thekey safe does not currently include installation onto wood.

ark Tamo™ Pro features & benefits:

The maximum security push-button key safe: The first and only multi-push button police preferred key box with and **LPCB LPS1175 Issue 8 A1 security rating.**

Attack resistant: Featuring additional **hardened anti-saw reinforcement pins**, hardened anti-penetration back pins, coned anti-drill hinge pins, a clamshell anti-prise design with an additional **stainless steel liner**, and an **advanced anti-pick mechanism**, providing unrivalled security.

Illuminated buttons and vault: Clear visibility day and night thanks to our **patented illumination technology**. No additional power source required.

Ultra high code security & multi push buttons: **Patented multi-push keypad** allows the same **button to be pressed up to 4 times**, resulting in **9.7 million possible combinations.**

Easy installation: **All fixtures and fittings (both set for single and rendered walls)** included, as well as **simple marking template** to ensure correct installation.

Comfortable use: **Large 7mm soft- touch illuminated buttons** allow easy use for all ages, from children to elderly. The button illumination improves visibility and enhances usability in low-light conditions, ensuring effortless 24/7 operation at any time of day or night.

Longevity & reliability: **Made from Zinc Alloy** known for its strength, anti-corrosive properties and attack resistance.

Large capacity: **Two internal hooks** to keep keys tidy with plenty of **room for up to 6 keys**, fobs and access cards. You can easily and safely retrieve and replace your keys without the hassle of them falling out.

All weather durability: Tamo Pro is rust and water resistant and includes a weather-resistant cover made from tough ABS plastic for further protection, designed for outdoor use, mounted onto external walls.

5 year extended warranty: The Tamo police preferred key safe range comes **with 5 years warranty when registered** on The Key Safe Company website. Only for mechanical parts. **Illumination module is covered by 2 years warranty**.

Technical Specification

Dimensions

Dimensions Exterior Excluding Weather Cover (HxWxD)	150mm x 77mm x 72mm
Dimensions Exterior Including Weather Cover (HxWxD)	160mm x 85mm x 75mm
Dimensions Interior (HxWxD)	90mm x 55mm x 19mm
Weight	2.2kg

Ordering & Spare Parts

960019	**ark Tamo™ Pro** Key Safe
AP003	Fitting Pack for WPS001FK - 4mm Masonry Drill Bit, 8mm Masonry Drill Bit and T30 Torx Bit
WPS001FK	XL Security Screws & Wall Plugs (Alternative Fitting Kit for Rendered Brickwork, Concrete and Stone) - 4 x wall plugs and heavy duty screws Fitting kit contains -4x 100mm screws and wall plugs. The screws and wall plugs may cause damage to a single skin wall.
AP001	Fitting Pack - 5mm Masonry Drill Bit and T30 Screw-driver
910006	Illumination Module + coin cell battery
910003	**ark Tamo™ Pro** Weather Cover
MPK311	Standard Security Screws (Fitting Screws for ark Tamo and Tamo Pro) for brickwork, concrete, flat stone and single walls. 4x 60mm self-tapping screws (as supplied with product) The screws are recommended to be used on single skin walls.

Regulatory Compliance

Security Rating	LPS1175, Issue 8, A1
UK and European Union	EMC – SI 2016/1091 and 2014/30/EU
RoHS Compliant	RoHS – SI 2012/3032 and 2011/65/EU

Power

Illumination Module Battery	Included: Replaceable 3-Volt coin cell battery, type: CR2032 The key safe is not reliant on power to operate. Replacement illumination module available.
Lithium Metal Battery	Up to 0.4g lithium content. Contained in the equipment (UN3091). Battery complies with UN 38.3.

Environmental

Operating Temperature	-30°C to +50°C
Cyclic Humidity	Maximum relative humidity of 96%rh
Chemical Resistance	Resists damage from common household cleaners
Dust and Water Resistance	IP55 (limited ingress permissible)
Salt Mist	2 hour salt spray at +35°C 22 hour storage at +40°C
