

# HOW TO TIE A SQUARE KNOT

STEP 1

**Run ends of cord under water prior to knotting.** Tie a left-over-right knot. Give yourself some slack on the loose ends.

STEP 2

Cross the right (blue) end over the left (gold) end. The right (blue) end is now on the left side.

STEP 3

Begin to wrap the left (blue) end around the front of the right (gold) cord to end up at the back of the gap between the ends.

STEP 4

Feed the left (blue) end through the gap to emerge at the front left hand side. Pull tight to complete the knot.
