SAFETY INFORMATION

Please read all instructions before using your Curalight device. Keep this user manual for future reference and be sure to follow all warning and safety instructions included.

- Follow all instructions and heed all warnings outlined in this manual.
- Do not stare directly into the LEDs. Prolonged exposure can strain or damage your eyes.
- Use this device only for its intended use and according to the instructions found in this manual. Any other use may result in injury.
- This device is not waterproof. To prevent damage or injury, do not submerge the device in any liquid. If the device does fall into liquid (while the device is operational), unplug from the power outlet.
- DO NOT REACH INTO THE LIQUID TO TURN OFF THE DEVICE.**
- Always plug into a power outlet first, and then plug in the device by using the barrel connector. The device should always be unplugged fully before being plugged into a power outlet.
- DO NOT OPERATE THE DEVICE WHEN IT OR ANY OF ITS COMPONENTS ARE DAMAGED.**
- Do not use the device while asleep.
- Do not use on areas of insensitive skin. Ensure that your skin is dry and free of any chemicals before use.
- This device is not intended for use by persons (including children) with reduced physical, sensory, or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the device by a person responsible for their safety.
- If any component is damaged or if any part needs servicing, especially the battery, please contact Curallux.
- Do not lie on top of or place weight onto the device.
- Do not sit on the device or crush the device.
- Do not use the device while operating a motor vehicle.
- This device is not meant to be used by children or pregnant women.
- Do not use any fasteners or tighteners to fasten Curalight to your body.
- Do not wrap device tightly around target area. Allow your skin to breathe during treatment. Ensure that Curalight is fastened securely but not tightly.
- Do not place anything over the device while in use such as a towel, blanket, clothing or any other insulating material.
- This device is not intended to be used on open wounds.
- Do not use device in the hot sun.
