JITENSHA | E-BIKE CHECKING

**1- About your charger :**

- Is the red light on during the charging phase?
- Is the green light on at the end of the charging phase?
- Has your charger fallen or is it damaged?

➔ If lights are not working correctly or if your charger is fallen or damaged, it is probably defective.

2- Connector checking :

It has to be like the pictures below:

If you have any doubts, take a picture as the model: front and side way.

3- Firmware checking

Turn on your engine and connect your bike to the app. Then follow these steps :

1. Click on the 2 horizontal bars at the top right
2. Click on "The All In One"
3. In « Firmware Version » click on "Check updates"
4. Update if necessary.

Thank you !
