

hushd^{PRO}TM

AVERA

Product features:

- ✓ 90° dorsal design
- ✓ Optimised fit
- ✓ Small and strong
- ✓ High comfort reported by customers (see below)
- ✓ 1.5mm thickness available for patient comfort and better compliance
- ✓ Customised advancement through interchangeable arches*

*See advancement information overleaf

Patient Review ★★★★★

"It is truly amazing. I barely feel like I am wearing a device, my jaw does not feel overly pushed forward and yet it has completely cured my snoring! No teeth displacement or discomfort after wearing for hours at night. It is a godsend and worth every penny!"

Good

hushd^{PRO}TM

AVERA

What We Need:

- ✓ Bite registration
- ✓ Scans
- ✓ Centric bite measurement from George Gauge
- ✓ Maximum protrusive bite measurement from George Gauge

Possible Combinations:

- ✓ U1/L1
- ✓ U1/L2
- ✓ U1/L3
- ✓ U2/L1
- ✓ U2/L2
- ✓ U2/L3

How does it all work?

Incremental increases between 50% and 90% of maximum protrusion from U1/L1 (the starting bite position) to U2/L3 (the furthest protrusion).

Additional notes

Default 1mm increments if no bite measurements are selected
Customisations include change of starting position and extended end point to max protrusion.
