

Calmer®

**Soften harsh sounds
without reducing volume**

**Here's our guide on getting the most of Calmer®
It won't be long and you'll soon be feeling calmer 😊.
In the meantime here's our top tips to a calmer you.**

Secure Fit

No Muffling

Calmer Sound

No Occlusion

Don't worry if you feel like there's not an immediate difference. The benefits of Calmer can sometimes be subtle and build over time.

THEY ARE GENTLE BUT VERY EFFECTIVE.
YOUR HEARING - JUST CALMER.

DISCREET,
COMFORTABLE
AND REUSABLE

SOFT FLEXIBLE SILICONE

Calmer is not an earplug. They won't reduce the volume of sound or block sound. They are designed to reduce our stress response to noises that annoy us without isolating us from sound

To feel the full effect of Calmer wear them in places where noises might normally cause you stress.

PERFECT FOR...

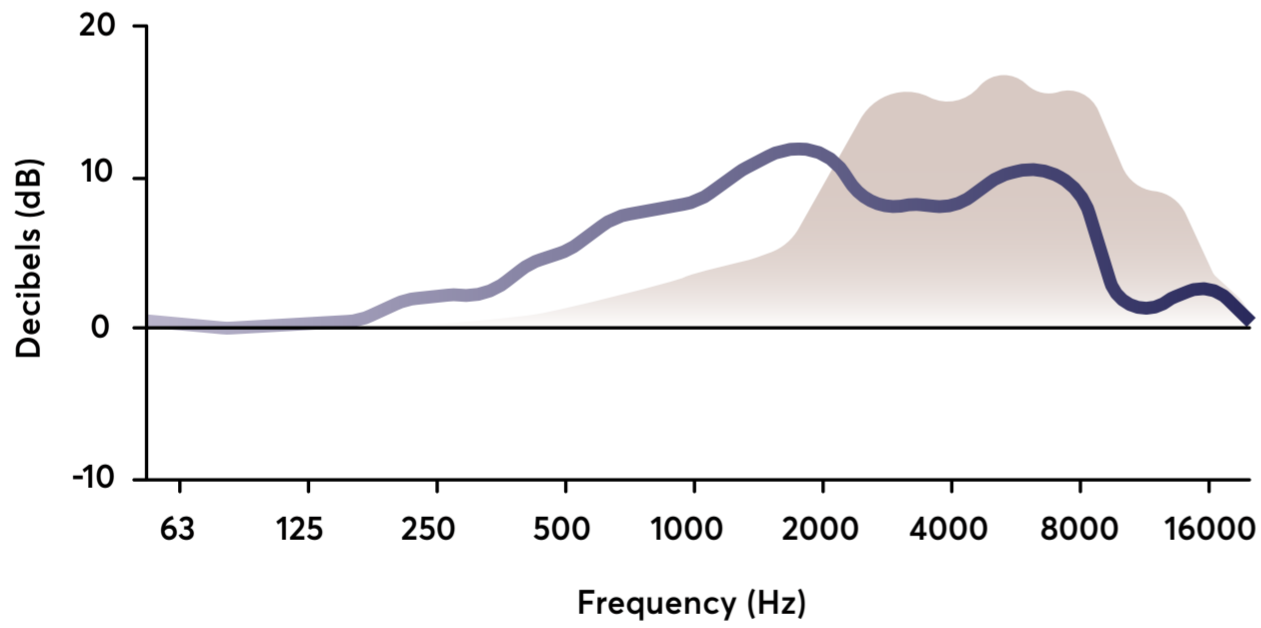

CROWDED
PLACES

CHATTING
WITH FRIENDS

NOISY
OFFICE

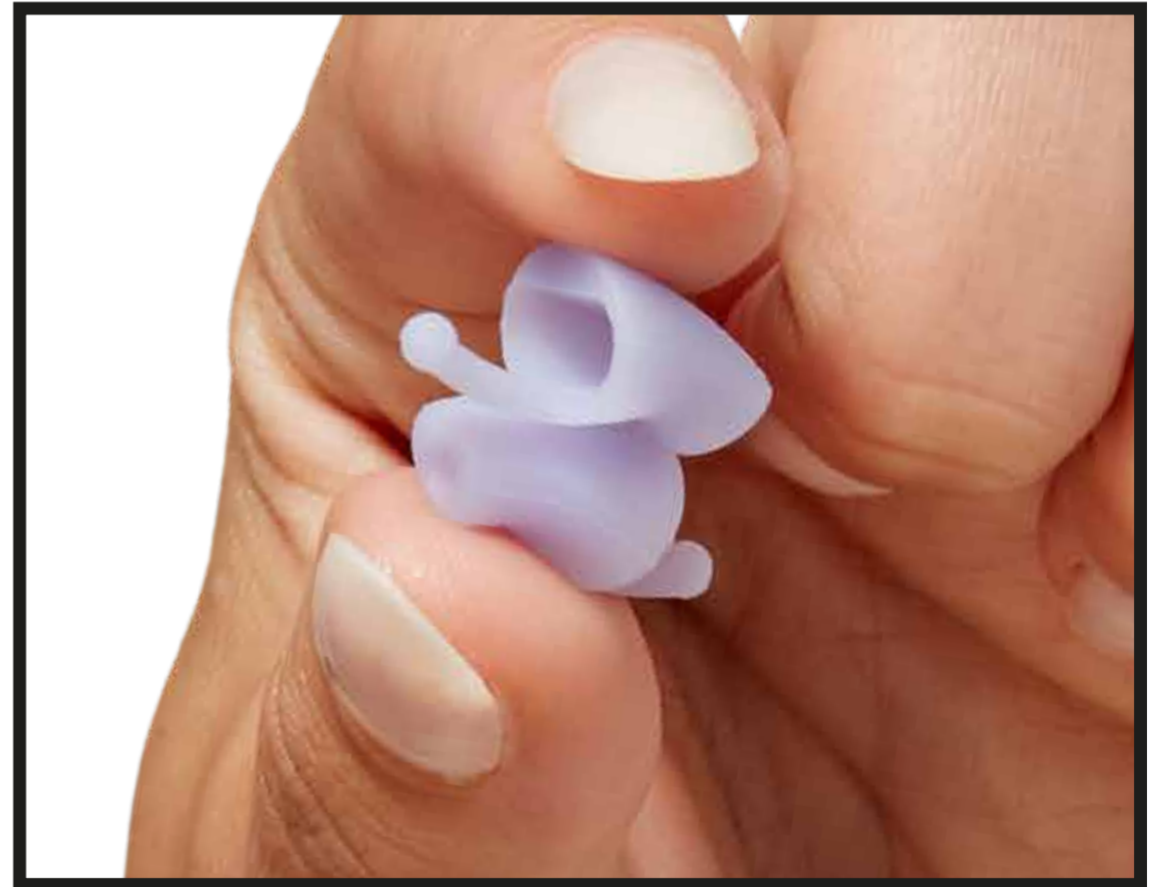

BUSY
TRANSPORT

This might be a busy home, a noisy street, a noisy classroom, irritating electrical sounds or around noisy eaters.

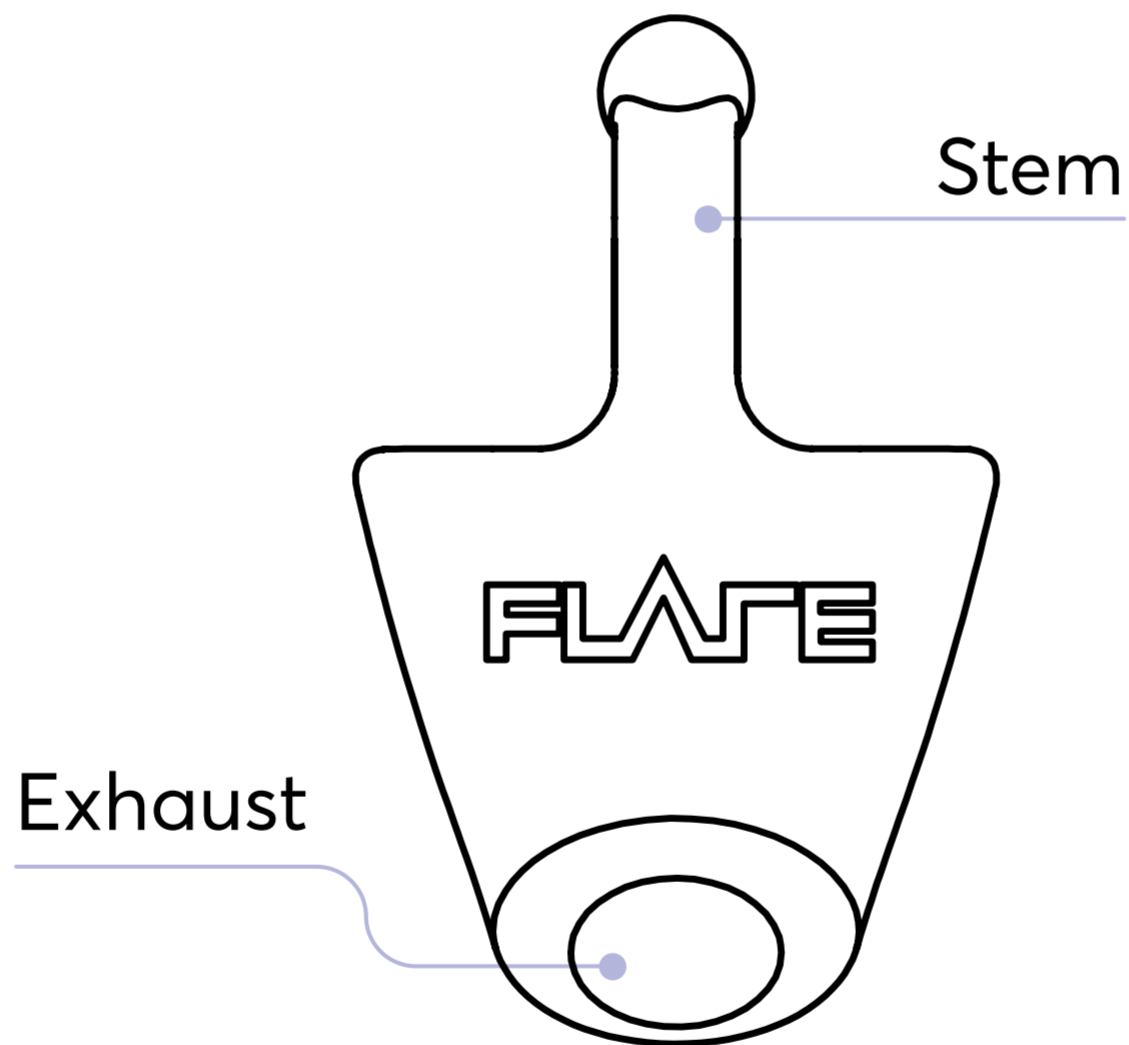

Frequency response with Calmer
 Frequency response without Calmer

The graph shows the average human ear frequency response and how Calmer adjusts it.

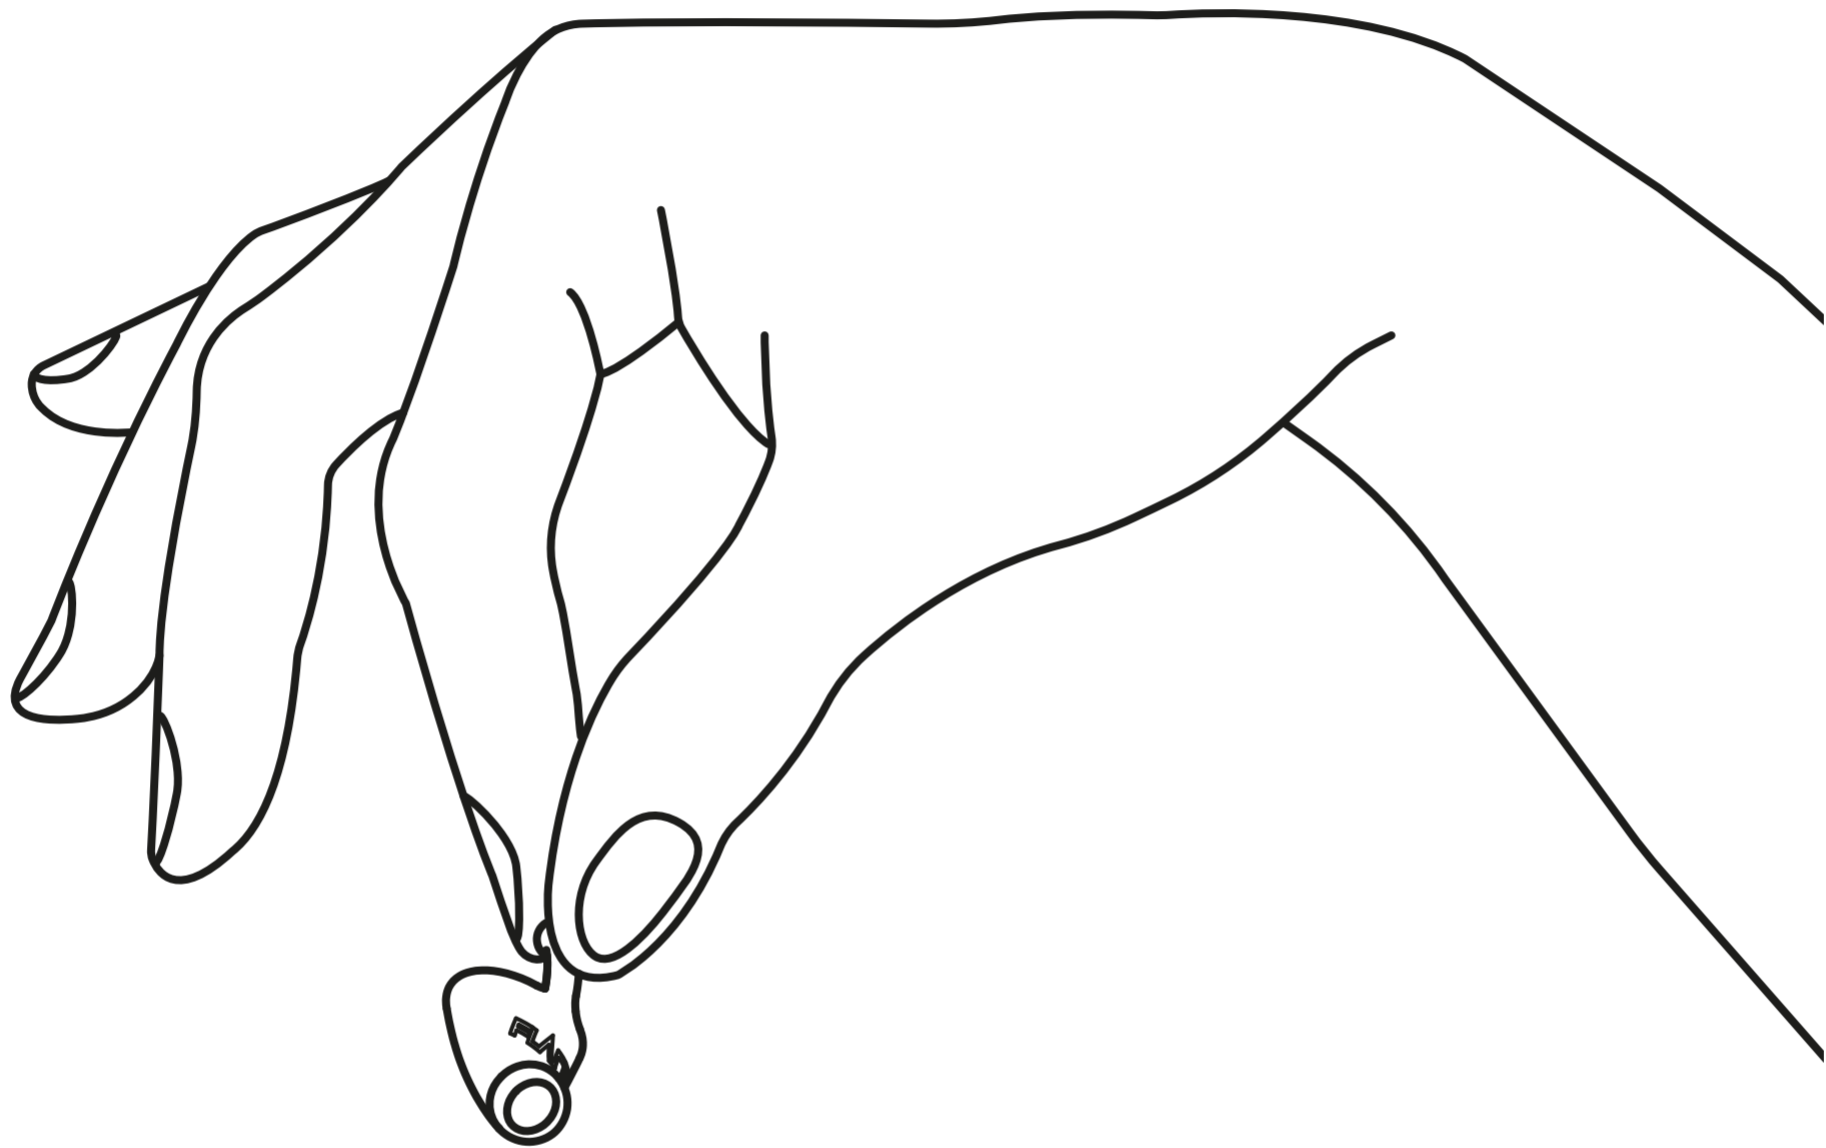

Calmer[®]

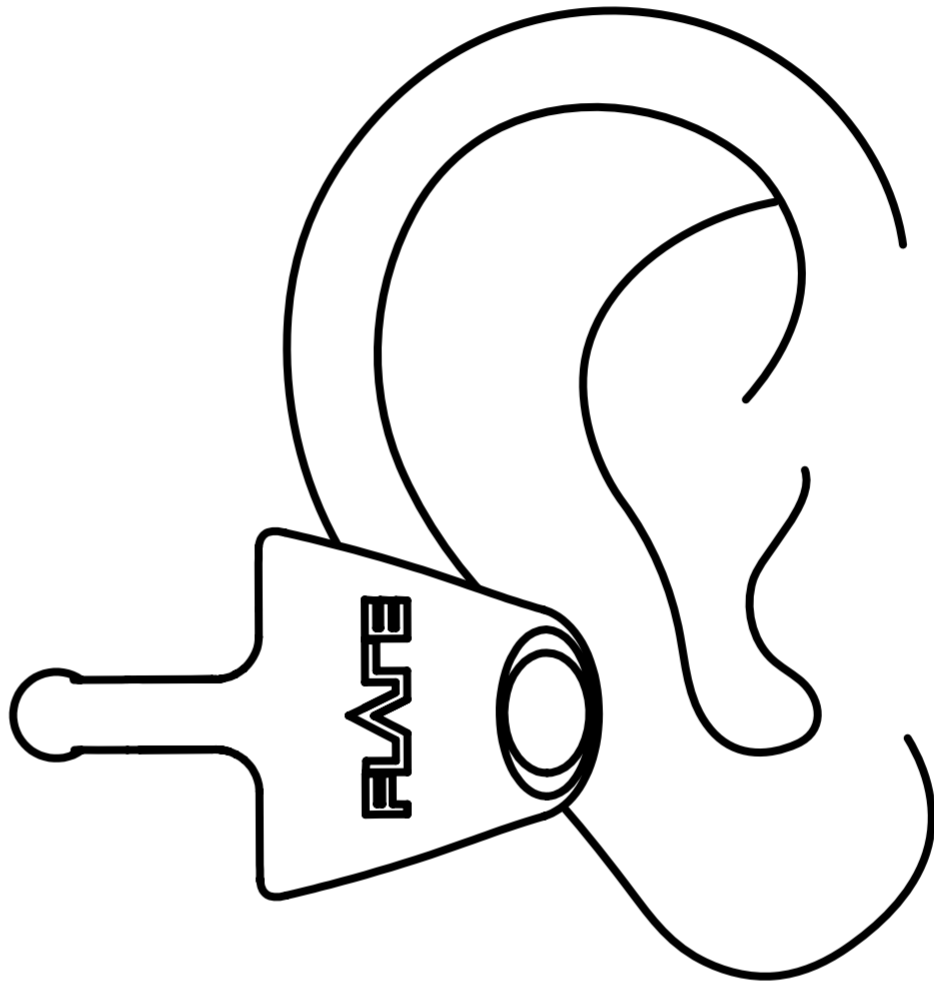

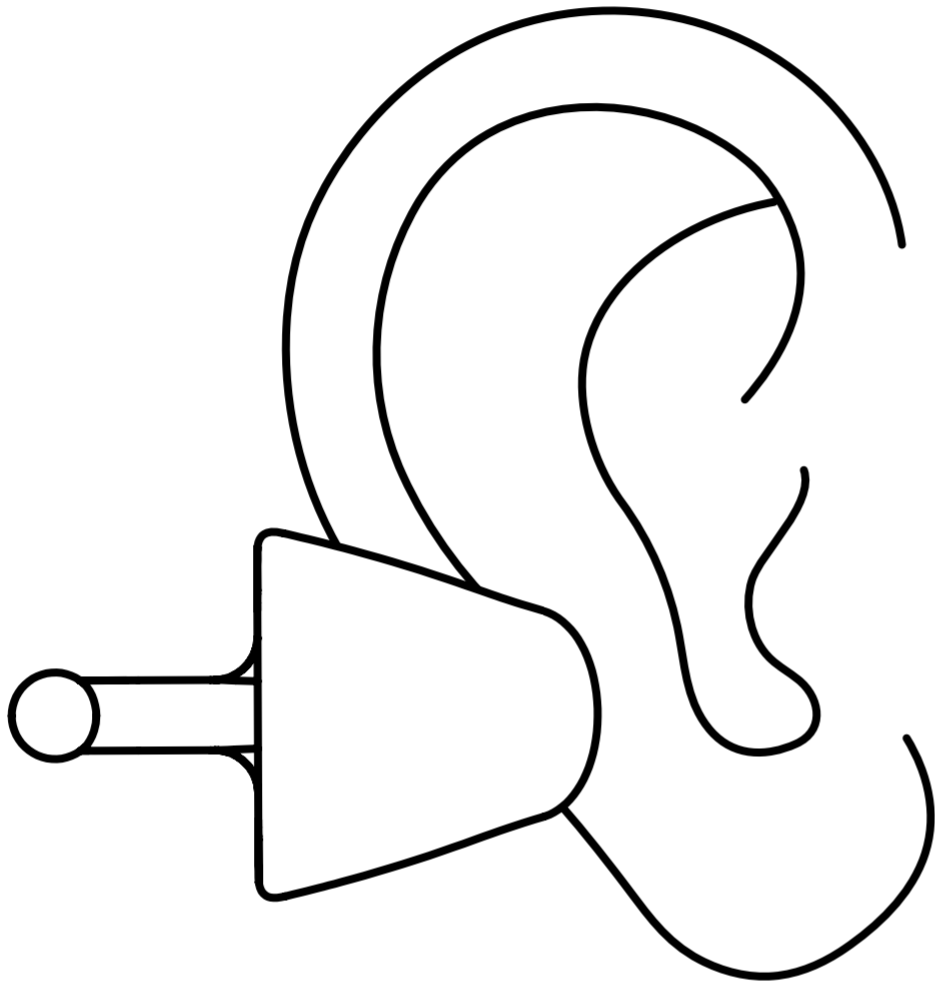

Instruction Guide

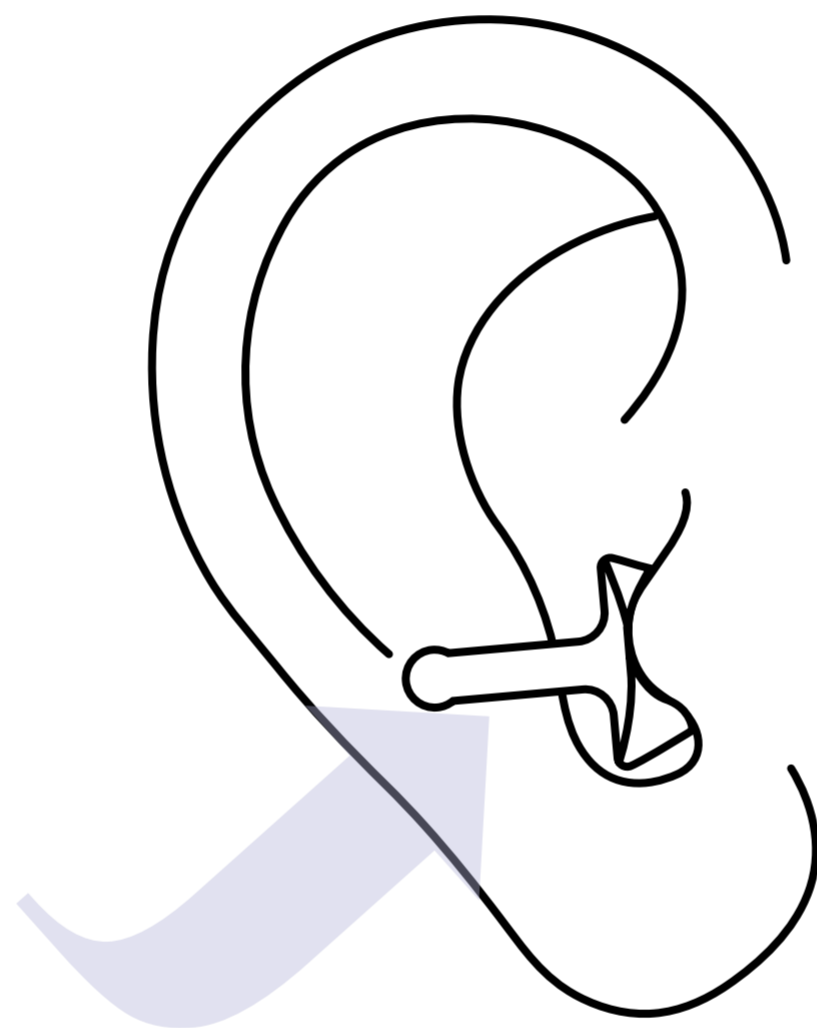

Pre-assembled,
Calmer[®] has a stem and an exhaust.

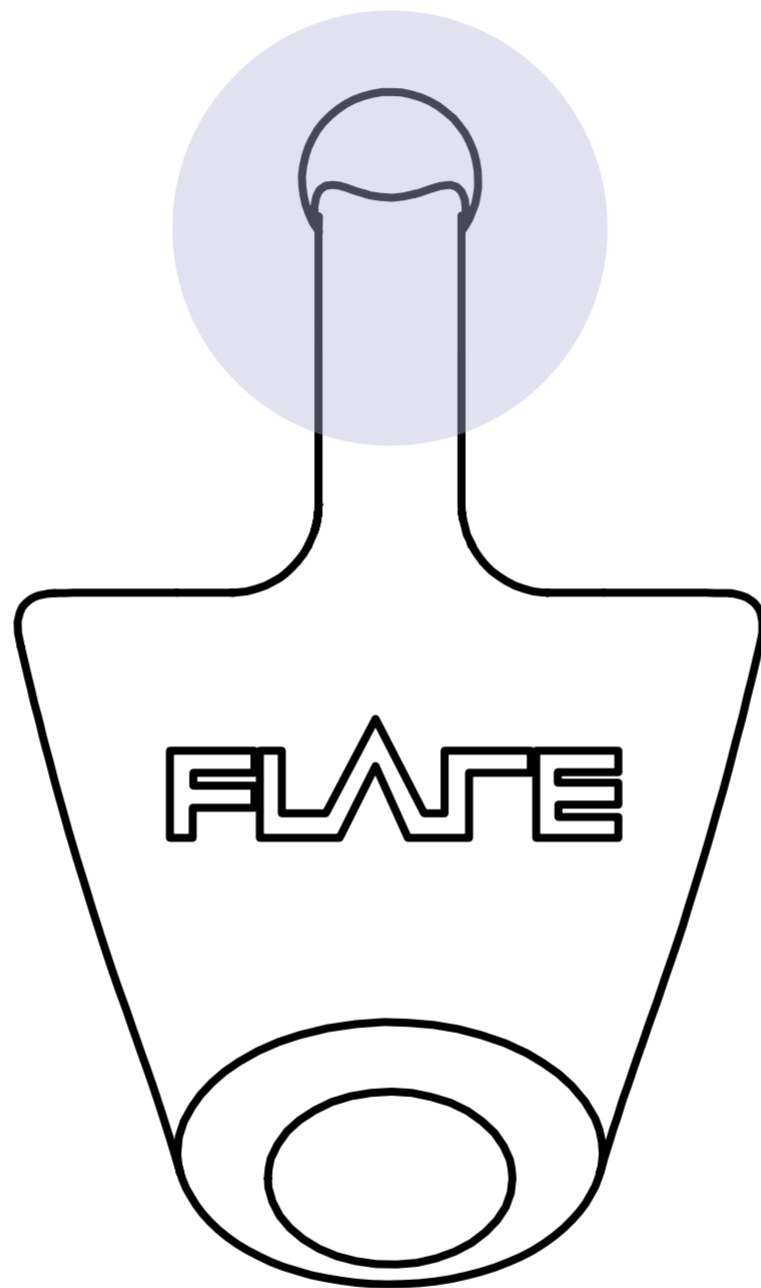

Always hold Calmer® by the stem.

Ensure the logo is against your ear when fitting Calmer® into your ear.

Don't push too hard when fitting Calmer® and always make sure the stem is easily reachable.

Use the stem grip on the body to
remove the Calmer®.

FLAME.
