

Water Dispenser Lower Door Replacement Instructions

MODELS

CLBL720SC

CLBL720SCBLK

IMPORTANT NOTES:

Replacement of the lower door should be performed by 2 people.

Use extreme caution when moving the water dispenser to avoid personal injury and/or damage to dispenser.

Children and pets should be kept away from work area during door replacement.

Drain reservoirs, unplug water dispenser, and remove bottle before performing work.

Step 1

Tools needed: Phillips head screwdriver.

Step 2

Drain reservoirs, unplug dispenser, and remove water bottle. Carefully lift dispenser and place it onto a sturdy, higher surface. Alternatively, dispenser can be leaned back against a stable wall, secured into position by the second person.

Step 3

Carefully move the water dispenser partially off the edge of the surface until you can see the screw.

Step 4

Using the screwdriver, remove the screw and place it in a safe location, like a magnetic tray.

Step 5

Carefully slide the door down and detach it from the pin hinge. Set the old door aside.

Step 6

Locate the pin hinge.

Step 7

Slide the new door up the pin hinge until door is securely in place. Then slide the lower portion of the door into place.

Step 8

Retrieve the screw and screw it back in. Be sure it's securely tightened and that the new door is fully attached and closes properly.

You're done!
