

Lock guide

Every Hybrid suitcase has TSA-approved combination locks. They are factory-set to 0-0-0 and can easily be changed to the desired code.

Step 1 Set the dials (1) to 0-0-0, then slide the reset button (2) from OFF to SET

Step 2 Roll the dials (1) to the desired code

Step 3 Slide back the reset button (2) to OFF

Step 4 The combination is now set. To unlock it, ensure the code is correct and then place pressure on the two push buttons (3) to open the locking mechanism
