

## Parts for the Scope Cam Adapter Kit from Fotodiox Pro - Camera and Smartphone Adapter Mount for Rifle Scopes

### Instructions on How to install on a Gun Scope

1. Install Camera / Plate Ring Mount to the Cell Phone Camera Mount.

2. Put the Helicoid Focusing Tube to the Camera / Ring Mount and screw it down tightly.

3. Now find a Scope Ring that fits the Scope

4. Insert the Scope Ring into the Helicoid Focusing Tube and screw it down with the tightening ring.

5. Insert the Scope into the Helicoid Focusing Tube and tighten to secure the scope.

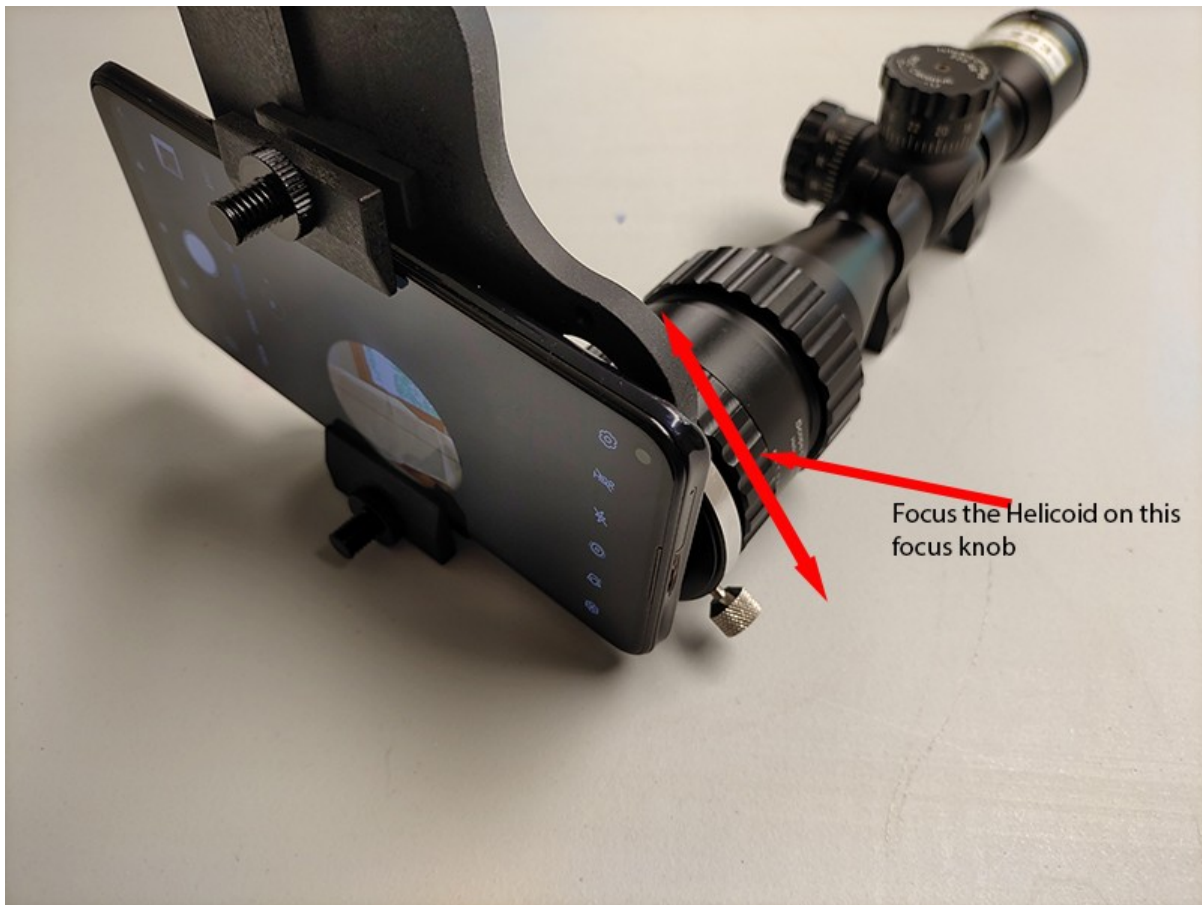

6. Mount Cell phone into the cell phone mount.

7. Center up the camera lens in the mount, and tighten cell phone Mount.

8. Test you Video or camera on your cell phone to see if the image will focus correctly. To focus the cell phone image, turn the Helicoid Focus Tube till image is clear. You may have to increase the size of the image on you cell phone to see detail in the image.

## Adding a camera to the Scope

Find out what size size Filter ring will fit the lens on your camera. This lens filter size is 40.5

Find the Filter Ring that will fit the lens (40.5)

Attach the Filter Ring to the Camera lens / Lens filter ring turns on Clockwise Off is Counter Clockwise.

Now attach the 40.5 Lens Filter Ring, and attach ring to the camera Lens 40.5 filter threads.

Now attach the Lens Filter Ring to the Camera / Plate Ring Mount. And turn the Tightening knob Clockwise to secure the Lens Filter Ring.

You can now attach the camera to the Helicoid Focusing Tube

You can add Extension tubes to the Helicoid Focusing Tube if you are not getting the lens to focus correctly.

You can add extension tubes to help with focus
