

## Mounting the Tube

- 1 Mount the lens by matching the two red dots, make sure it locks.
- 2 Attach any or all rings. Each ring brings you closer to the subject as you increase the distance.
- 3 Attach the camera mount ring and mount onto camera the same way a lens does.
- 4 Done, start your macro shot session. Be sure to use the widest aperture on your lens for better quality images.

## Dismounting The Tube

- 1 Remove from camera, the same way regular lenses are removed.
- 2 Remove the lens by sliding pin in direction of the camera body.

- 3 Rotate the lens until completely detached from Tube.
