	Circumference	Length
f^1		$e-f^1$
f		$e-f$
e		
d		$e-d$
c		$e-c$
b^e		$e-b^e$

Knee
☐ Right ☐ Left

Color
☐ Titan ☐ Beige

Extras
☐ Siliconized edge* (add 5 cm to the length)

Velcro fastening*
☐ Top**

Patient details***
☐ Male ☐ Female

☐ Obese ☐ Pronounced muscles

Age _____ Height _____

* Subject to additional charges
** Not possible in combination with a siliconized edge; not circular
*** Optional; please specify special anatomical features to ensure an accurate fit of the finished product.

All measurements must be entered to ensure proper treatment.

f^1 Thigh: Measure the circumference at least 14 cm above the middle of the knee (e). If the circumference at point f^1 is more than 47 cm, then the circumference must be measured at a higher point, where $e-f^1$ is at least 17 cm. (note: length $e-f^1$ standard GenuTrain = 19 cm)

f Base of thigh (approx. middle of e and f^1)

e Middle of knee

d Narrowest point below the knee (approx. 5–6 cm below the knee)

c (biggest) Calf circumference

b^e lower end
Length $e-b^e$ at least 12 cm
(note: length $e-b^e$ standard GenuTrain = 13 cm)

Notes:
• Take measurements with a slight flexion (30°).
• The length is measured on the outside of the leg.
  The distance between $e-f^1$ should not be less than the distance between $e-b^e$.
• If the circumference of f^1 exceeds 60 cm, we recommend attaching a silicone top band.

The purchaser is responsible for ensuring that all size information is correct. Custom-made solutions cannot be returned.
