ASSEMBLY SHADE KEY	Tension Poles	Grommets	Guylines
	Anchors	Support Poles	Strut Pole*

\*Strut pole only used when structure is narrower than shade

### STEP 1 DETERMINE MOUNTING

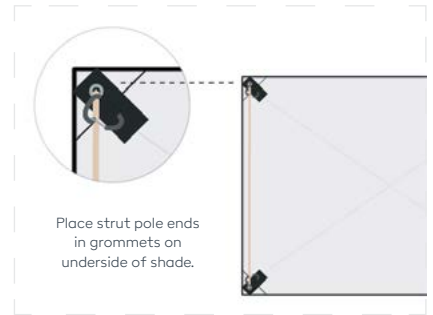

Mount on a van, car, trailer, tree, fence; You name it.

### STEP 2 ATTACH ANCHORS

It's very important that your anchor points are secure! If using suction cups, be sure to wipe the surface clean first and make sure they're securely attached before proceeding.

### STEP 3 \*strut pole may not be needed ASSEMBLE & ATTACH STRUT POLE

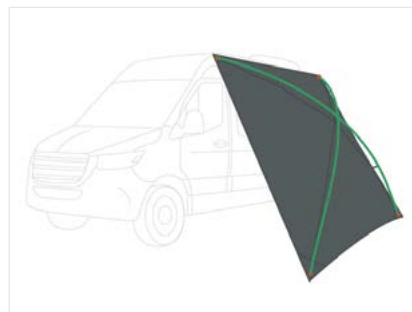

Use strut pole if mounting MoonShade to anchor points less than 7 feet apart.

### STEP 4 CONNECT SHADE TO ANCHORS

If strut pole is used, securely attach it directly to anchors. Suction cups with velcro straps can be used with the strut pole to attach MoonShade to smaller vehicles.

### STEP 5 ASSEMBLE & ATTACH POLES

Assemble tension and support poles. Place tension poles in corner pockets diagonally across MoonShade and attach clips.

### STEP 6 SET UP SUPPORT POLES

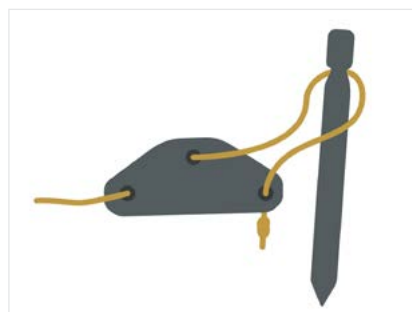

Place support poles in front corner grommets and hoist shade into an upright position. Visit [moonfab.com/setup](http://moonfab.com/setup) to see how to run support poles diagonally to the side of your vehicle by attaching suction cups to the base of the poles.

### STEP 7 SECURE & TENSION GUYLINES

Attach guylines to loops in front corners of MoonShade.

Using the included stakes or other secure ground anchors, attach guylines and use the included line tensioners to secure your MoonShade in place

**YOUR MOONSHADE IS SET!  
INSERT CHAIRS AND COLD BEVERAGES.  
RELAX AND ENJOY!**

More detailed instructions, including videos, set-up tips, and FAQs can be found at [moonfab.com/setup](http://moonfab.com/setup).

**\*\*Refer to the Tall-Connect instructions in the carrying case if your anchors are too high to reach.**
