Mopping mode

Instructions for use

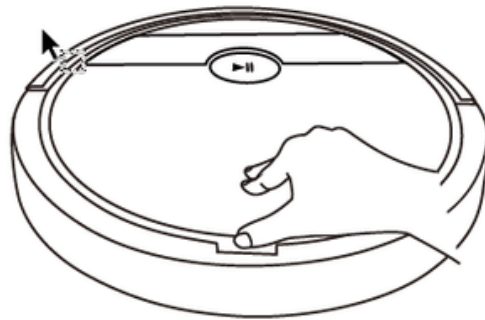

How to use the host:

1. Turn the power switch of the host to "no", turn on the power switch, and the indicator light will always be blue. If the battery is too low, it will automatically stop working. At this time, the intelligent sweeper sounds an alarm.
2. Press the auto switch button on the machine or start it with app, and the automatic cleaning button will enter the automatic cleaning mode. The program will automatically clean according to the planned path of the system.
3. Each time you press the Auto button, switch different cleaning modes (free cleaning, bow cleaning, fixed-point cleaning, edge extension cleaning and floor dragging mode) in turn. Press and hold to enter standby mode

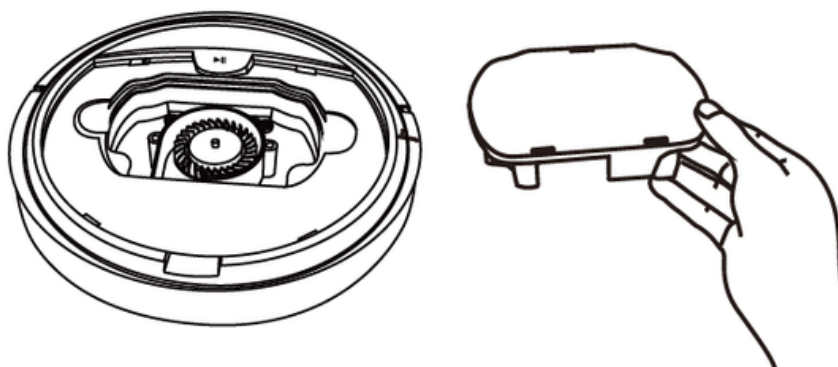

Cleaning and maintenance

Installation and unloading of dust box and fan assembly (must turn off the power of the host first):

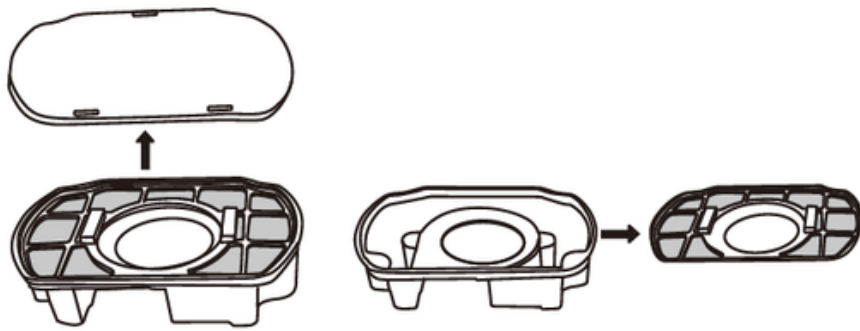

- 1 Open the top cover of the main unit with your hands upwards.

2. Take out the dust box

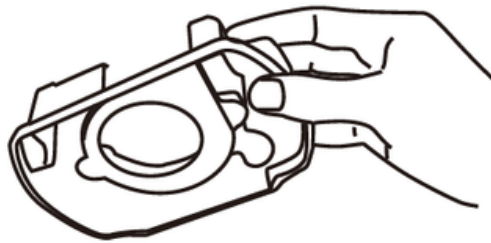

3. Open the dust box cover and take out the filter

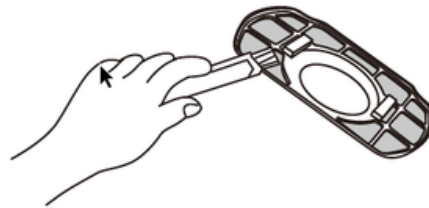

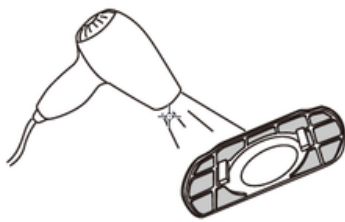

Cleaning of dust box and fan assembly:

1 First remove the dust, then take the cleaning brush to clean it.

2. The filter screen can be blown clean with a hair dryer or brushed with a cleaning brush. After cleaning, it can be firmly installed in the reverse order before disassembly.

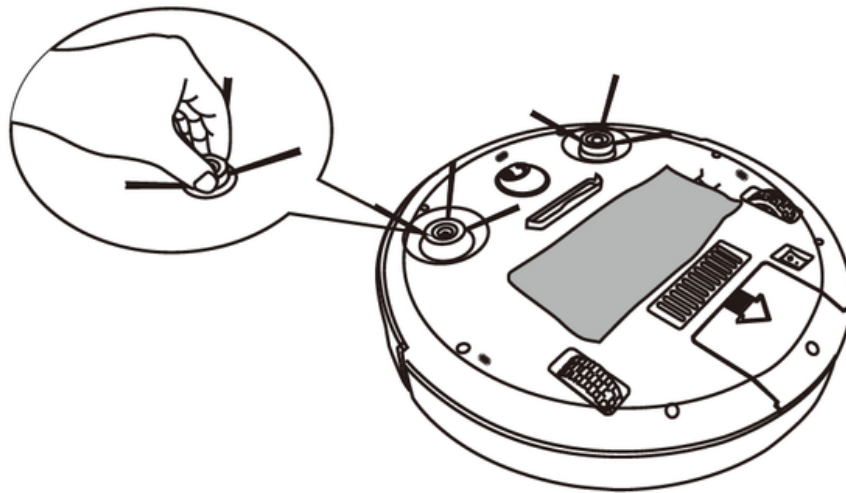

Loading and unloading of side sweeping brush:

1. Press the side sweeping brush into and out of the main shaft, and then the side sweeping brush can be installed and unloaded.

Cleaning of the brush:

1. Regularly remove the hair or large dust particles on the brush, remove the dust on the suction port, and then directly clean the paper scraps or small particles with the cleaning brush. For the involved hair or yam and other objects, please remove the front brush, cut it with scissors or pull it out by hand to improve the cleaning performance. Cleaning can be carried out according to the treatment and cleaning of the brush.
2. Cleaning of the brush: 1.

Common faults and solutions:

1. The smart sweeper cannot work or the cleaning work is weak and makes intermittent sounds.

Solution:

- Check whether the dust box, filter, suction port, etc. are clean
- Low voltage, please turn off the switch and use the USB charging cable to charge.

2. The smart sweeper cannot be charged.

Solution:

- Check whether the charging cable is properly connected to the host and whether the red light of the host is on.

3. Increased noise during cleaning.

Solution:

- Clean the dust box and filter.
- Check if the brush is too dirty

4. If the machine fails, there are the following situations:

Solution:

- The machine was entangled by wires scattered on the ground
- The machine is entangled with lower curtains or soft objects.
- There are too many obstacles in front of the machine
- If the fault still exists after cleaning according to the above steps, please contact customer service department.

How to use the water tank and matters needing attention:

How to use:

- Wet the special mop for the water tank and stick it on the bottom of the water tank.
- After filling the water tank with water, close the lid and dry the outside
- When the machine is turned off, put the machine flat in reverse, align the water tank connecting column with the two screw holes at the tail of the machine, press it tightly, turn on the main switch at the bottom of the machine, and place the machine on the horizontal ground in reverse.

4. Press the middle button on the remote control to start the sweeper, and then press the "m" button for 4 times, and the machine will "tick" for 5 times to switch to the "mopping mode". Or press "mop" directly after starting the machine with the mobile app. (other modes are not suitable for using the water tank, please do not use it illegally.)

5. Take out the water tank: after stopping the machine, press both sides of the water tank with both hands and thumbs, point to the bottom of the top machine with double food, and use vertical force to take out the water tank. Do not pull it out with one hand to avoid damaging the water tank.

Matters needing attention:

1. Please clean the water tank mop in time. If there are foreign objects at the bottom, please clean it up in time to avoid affecting the use.
2. When using the water tank to mop the floor, please do not use it with the intermediate dry mopping cloth at the same time to avoid excessive load on the machine.

Optional water tank:
